

## **Redding, CA**

### **Junior-level Hydrogeologist**

CH2M HILL's Redding office is looking for a junior-level hydrogeologist who will support projects associated with site characterization, soil/groundwater remediation, and water supply for various public- and private-sector customers. These projects will include a mix of office and fieldwork responsibilities. Office tasks include data interpretation, quantitative modeling using analytical and numerical methods, data visualization, report writing, aiding in the preparation of presentations, and the coordination of logistics for field efforts. Fieldwork and travel may also be required (typically 0 to 10 percent of time), depending on project needs. Fieldwork tasks generally include drilling oversight, logging soil borings, installing wells/piezometers, sampling various media (groundwater, soil, surface water, etc), aquifer testing, documenting activities on site, and coordinating with subcontractors (drillers, sub-consultants). Candidate must be able to communicate in an effective manner, both verbally and in writing. While the successful candidate must be able to work independently with some supervision, this person must also work effectively as part of larger project teams. Candidate must have a solid understanding of basic principles of hydrogeology, be familiar with contaminant transport mechanisms, and be proficient with computers and a variety of software applications. BA/BS required, MS strongly preferred in Hydrogeology, Hydrology, Geology, Civil Engineering, Water Resources Engineering, or Environmental Engineering with a groundwater emphasis. Minimum GPA of 3.0 required with 0 to 5 years of experience.
